

## *Grand Bahama Saltwater Fly Fishing*

---

*H2O Bonefishing has been established on the island of Grand Bahama for 8 years. As one of the islands leading bonefishing operations we constantly strive to give our clients exposure to some of the greatest bonefishing waters in the world. With unrivalled service and accommodation, matched with a team of passionate professionals come and experience a fly-fishing holiday of a life time.*

*Our Island of Grand Bahama boasts one of the most expansive Bonefishing areas in the Bahamas with shallow Flats extending 25 miles to the west and more than sixty miles to the east of our fishing location. Our fishery is also part of the extensive and undisturbed, 2500 square mile Little Bahama Bank.*

*As a true saltwater fly fishing outfitter h2o Bonefishing constantly strives to ensure our customers experience the very best this world class fishery has to offer. Whether beginner to the salt or hardened saltwater angler each client is exclusively catered to both on and off the water.*

*With the Islands international airport able to accommodate large sized jets it makes h2o Bonefishing the most easily accessed dedicated Bonefishing location to get to in the entire Bahamas.*

### **Accommodation**

*EACH OF H2O BONEFISHING guests are provided a beautiful waterfront room with their Bonefishing package. Two separate packages are available to include either a one bedroom suite or deluxe room. Each room can be furnished with a choice of 2 beds for sharing fishing partners or a very spacious King option for couples or single anglers. Cot beds are also available for families as well as pull out sofa bed options for the suites. Satellite TV, direct dial phone, refrigerator and in-room coffee maker. Also available is a business center and wireless internet access for all our guests.*

*The new one-bedroom suites offer an upscale rooming option with lush tropical gardens and varying color-scheme. Mahogany wood and beautifully appointed custom decor highlight each of the spacious one bedroom suites. Although our anglers will experience the fishery as a very remote and undisturbed one, this cannot be said for their lodging which is perfectly located allowing all our anglers immediate access to the Islands top restaurants and myriad activities and amenities found within a short walk of their room. Should non angling activities for wives and/or family be a consideration then you will find it very hard to even match this programs ability to cater to them while knowing there will be zero compromise to the quality of your flats fishing.*

## ***The Fishery***

*THE BONEFISHING is exceptional with opportunities to cast at larger schools of bones or to smaller groups, pairs and singles. This variety is only matched by that of the Flats environment itself where anglers will experience vast and varying bottom structure from soft sand and grass flats to harder bottom white sand and marl flats. The shoreline of Grand Bahama's north side is extremely soft and protected by miles of mangroves, in places several miles deep however hard bottom flats are accessed by boat that allows for wading.*

*The average size of our bonefish at 4 to 5 lbs is impressive and is an added attraction for many of our anglers who regularly catch fish in the 7-8 pound range and of course there are those anglers that also tangle with double digit bonefish that would be described as trophy fish no matter where in the world they were caught. Our club record bonefish on fly tipped the scales at 14 1/2 pounds before release ! While the size of our bones has impressed many anglers it has also been the quantity of fish that have had many anglers returning year after year.*

## ***Offshore Fly Fishing***

*Since 2004 one of the world's most unique fly fishing programs has been available with h2O Bonefishing. Our deep sea fly fishing program provides fly fishing excursions for yellowfin tuna, dorado (mahi-mahi), skip jack tuna, blackfin tuna on the same day as flats fishing.*

*Schools of yellowfin tuna move into local waters in April to supplement other tuna species and of course the ever present Dorado. All are targeted offshore until September. Yellowfin tuna average 15- to 25- pounds and have been landed up to 60- pounds on fly. Mahi mahi vary greatly in size from small schoolie fish to 50 lb monster bull dolphin. Several of our anglers have caught Dorado on the very same fly and fly rod set up they were using only an hour before on the flats! Our offshore fly fishing is almost exclusively carried out with floating fly lines and at times the use of surface poppers make for astonishingly visual takes at boat side.*

*An appealing aspect of fly fishing offshore is the bite time which turns on late afternoon and early evening. This allows our anglers to fish the flats and also have the option to experience the action offshore on the very same day. Alternatively you may want to utilize this program for arrival or departure days.*

*All fly fishing equipment is included in our offshore program. This means we provide all the specialty fly rods, reels, leaders and flies for these trips. Due to the nature of this program and the ever changing fuel prices please call for an exact price.*

### **Testimonials**

*We couldn't wait to get back to Atlanta and tell everyone about our experience with H2O Bonefishing in Grand Bahama. The trip was a real pleasure. I have fished in a number of places and found the fishery to be excellent. The bones themselves were bigger than most of the Bahamas fish I have experienced. We took the whole family and were delighted with the H2O experience.*

**Alex and Fritz Van Winkle, Atlanta, GA – February 2013**
